SUMMARY

UI/UX and Product Designer with hands-on experience in user research, wireframing, prototyping, and design systems. Skilled in creating responsive and accessible digital products that solve real-world business challenges. Designed enterprise applications, dashboards, and multi-role platforms while collaborating on design-to-development workflows. Passionate about delivering intuitive experiences that balance user needs with business goals.

EDUCATION

Bannari Amman Institute of Technology — Erode, Tamil Nadu
B.E. Computer Science and Engineering

GPA: 8.07 / 10

TECHNICAL SKILLS

UI/UX Design: User Research, Wireframing, Prototyping, User Flows, Information Architecture, Interaction Design, Design Systems, Responsive Design, Mobile-First Design, Accessibility (WCAG), Dashboard Design, Heuristic Evaluation.

Product Design: Design Thinking, Product Strategy, Problem Solving, Persona Development, User Journey Mapping, Feature Prioritization, Usability Testing, A/B Testing, Data-Driven Decision Making, Competitive Analysis, SaaS Product Design.

Graphic Design: Branding, Visual Identity Design, Typography, Color Theory, Visual Storytelling, Social Media Design, Marketing Creatives, Poster & Banner Design, Presentation Design.

Tools & Platforms: Figma, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe XD, Canva, Framer, FigJam, Miro, Zeplin, LottieFiles, Notion.

Frontend Collaboration & Design Practices: HTML5, CSS3, Tailwind CSS, Basic JavaScript, Design-to-Code Collaboration, Developer Handoff, Design Documentation, Component Libraries, Asset Export & Optimization, Cross-Browser Compatibility, Human-Centered Design, Stakeholder Communication, Design Reviews, AI-Assisted Design Workflows.

AI-Assisted Design Tools: ChatGPT, Figma AI, Adobe Firefly, Canva AI, Framer AI, Relume AI.

EXPERIENCE

FULL STACK DEVELOPER | INTERN | Cognizant, Bengaluru

May 2025 – Aug 2025

- Developed and enhanced web application features using modern frontend frameworks (React.js) and backend APIs under senior developer guidance.
- Built responsive, cross-browser-compatible UI components adhering to design guidelines and accessibility best practices.
- Improved application performance through bug fixes, code refactoring, and participation in regular code review cycles.
- Integrated frontend components with backend services and databases to support end-to-end application workflows.

FACILITYSYNC – WORKPLACE & FACILITY OPERATIONS MANAGEMENT PLATFORM | FREELANCE

- Designed an enterprise workplace operations platform that centralized meeting room bookings, maintenance requests, asset tracking, and employee service management.
- Built multi-role workflows for Employees, Facility Managers, Maintenance Teams, and Administrators, reducing operational friction through intuitive task-based experiences.
- Developed Meeting Room Booking, Asset Management, Visitor Management, and Maintenance Request modules featuring real-time availability tracking, request prioritization, and service status monitoring.
- Established a responsive design system and reusable components to support scalable product growth and efficient developer collaboration.

PROJECTS

WORKSPHERE – ENTERPRISE EMPLOYEE EXPERIENCE PLATFORM

Tech Stack: Figma · FigJam · Miro · Adobe Illustrator · Notion · Design Systems · WCAG 2.1 · Responsive Design.

- Designed and built a unified HR platform that consolidated 6+ disconnected employee tools into a single system for attendance, performance, learning, and analytics management.
- Architected an 8-module platform including Dashboard, Attendance, Tasks, OKRs, Performance Reviews, Learning Portal, Announcements, and HR Analytics with role-based experiences for Employees, Managers, and HR Admins.
- Created a scalable Design System with reusable components, typography tokens, and standardized UI patterns, accelerating developer handoff and ensuring design consistency.
- Developed interactive HR Analytics dashboards visualizing headcount trends, attrition rates, leave utilization, and department performance while ensuring WCAG 2.1 AA accessibility compliance across desktop, tablet, and mobile devices.

SUPPLYCHAIN NEXUS – PROCUREMENT & VENDOR MANAGEMENT SYSTEM

Tech Stack: Figma · Miro · Zeplin · Adobe XD · Notion · RBAC · Data Visualization.

- Designed an enterprise procurement platform that digitized the complete purchasing lifecycle from request creation to vendor payment approval.
- Built multi-role workflows for Requesters, Procurement Managers, Finance Approvers, and Administrators, reducing approval bottlenecks through streamlined user journeys.
- Developed Purchase Request and Vendor Management modules featuring budget validation, performance scorecards, contract expiry tracking, and vendor comparison tools.
- Created procurement analytics dashboards to monitor spending, vendor performance, purchase order cycle time, and budget utilization while implementing role-based access controls throughout the application.

INSIGHTHUB – BUSINESS INTELLIGENCE & EXECUTIVE ANALYTICS PLATFORM

Tech Stack: Figma · Framer · Adobe Illustrator · FigJam · LottieFiles · Notion · AI-Assisted Design.

- Designed an executive analytics platform that centralized fragmented business reports into a unified decision-making dashboard.
- Built customizable KPI dashboards displaying Revenue, Gross Margin, NPS, Headcount, and Department Performance with drill-down analytics capabilities.
- Implemented AI-generated insight summaries that translated metric changes into plain-language narratives for non-technical stakeholders.
- Developed a custom report builder with drag-and-drop widgets, scheduled report delivery, and accessible data visualizations optimized for color-blind users and screen readers.

BRANDSYNC – ENTERPRISE BRAND IDENTITY & MARKETING ASSET MANAGEMENT PLATFORM

Tech Stack: Adobe Illustrator · Adobe Photoshop · Adobe InDesign · Figma · Canva · Notion · Brand Systems · Typography.

- Designed a centralized brand management system that standardized visual assets and marketing materials across multiple departments, ensuring consistent brand communication across digital and print channels.
- Created a comprehensive brand identity system including logo variations, color palettes, typography guidelines, iconography, illustration styles, and reusable design templates.
- Developed marketing assets such as social media campaigns, presentation decks, email banners, event collateral, brochures, and promotional materials optimized for multiple platforms and screen sizes.
- Established accessibility-focused visual standards by implementing typography hierarchies, color contrast guidelines, and scalable layouts to maintain a cohesive user experience across all brand touchpoints.

CERTIFICATIONS

Google UX Design Professional Certificate | Coursera

- Developed practical skills in User Research, Information Architecture, Wireframing, Prototyping, Usability Testing, Responsive Design, and designing user-centered digital experiences.

IBM Enterprise Design Thinking Practitioner | IBM

- Learned enterprise design thinking methodologies, stakeholder collaboration, problem framing, user-centered innovation, and iterative product development for solving real-world business challenges.
