EDUCATION

Bannari Amman Institute of Technology ,Tamilnadu

GPA: 7/10

B.E-Computer Science and Engineering

Kongu kalvi Nilayam Mat Hr School ,Tamilnadu

86.31/100

Computer Science

TECHNICAL SKILLS

- **Languages:** React, Javascript,HTML,CSS
- **Tools:** Figma,Photoshop,Illustrator,Canva
- **Design Skills:** User-Centered Design,Wireframing,Prototyping

PROJECTS

- **Enterprise Event Management System – UI/UX Case Study (Figma, UX Research, Design Systems, Responsive Design)** Designed an end-to-end UI/UX solution for an enterprise-level event management system, including admin dashboards, event team workflows, and requester portals. Conducted user research to identify pain points, created wireframes and high-fidelity designs, and built a scalable design system with reusable components. Ensured responsive layouts and improved task efficiency through clear information architecture and intuitive user flows.
- **Paytm Mobile App UX Redesign for Improved Usability (Figma, User Research, Prototyping, Usability Testing)** Redesigned an existing mobile application to enhance usability and user engagement by identifying UX issues through heuristic evaluation and user feedback. Simplified navigation, optimized user flows, and redesigned key screens with improved visual hierarchy and accessibility. Delivered interactive prototypes demonstrating before-and-after improvements and validated solutions through usability testing.
- **Scalable Design System & Component Library (Figma, Auto Layout, Component Variants, Accessibility)** Created a scalable design system to ensure visual consistency and faster product development across multiple screens and platforms. Developed reusable UI components, typography styles, color tokens, and layout guidelines using Auto Layout and variants. Documented component usage and accessibility standards to support efficient design-to-development handoff and long-term product scalability.

ACHIEVEMENTS

- BIT HACK'23-Software Edition | Qualifies finalist
- PRAYATNA 23 (LAKSHYA) | Winner in technical assessment

PAPER PRESENTATION

COVID 19 HOSPITAL MANAGEMENT|PSG COLLEGE OF TECHNOLOGY|PRAYATNA 23(VIGNYAN BIKSHA)| 02/2023

- Prepared and presented a hospital management system concept focused on improving COVID-19 healthcare operations. Designed system workflows for patient data management, bed availability tracking, appointment scheduling, and medical inventory control. Emphasized real-time data access and efficient resource allocation to support faster decision-making by healthcare staff.(TOOLS:HTML, CSS, JavaScript,Java,MySQL,System Design, Workflow Modeling, Agile Concepts)

MOVIE RECOMMENDATION APP|KARUNYA UNIVERSITY|EVOGEN'23 (Ideathon)| 10/2024

- Presented an idea for a movie recommendation platform that delivers personalized suggestions based on user preferences and viewing behavior. Focused on designing a user-friendly interface and explaining the recommendation logic using machine learning concepts. Highlighted features such as smart filtering, intuitive browsing, and enhanced content discovery during the ideathon.(TOOLS:HTML, CSS, JavaScript,React,MySQL,REST API)

HACKATHONS

- Participated in a **SIH-Hackathon**, collaborating with a multidisciplinary team to design and prototype a user-centric digital solution within a limited time frame.
- Worked closely with developers to align design decisions with technical feasibility and deliver a functional prototype under tight deadlines.
